Week 2 Lab Instructions

Sample buggy code and broken makefile

- http://goo.gl/JHMpj6 (need to access this using tamu.edu email)

Debugger

Target

Learn to use GNU Debugger (GDB).

Tutorials

- http://cs.baylor.edu/~donahoo/tools/gdb/tutorial.html
- http://www.unknownroad.com/rtfm/gdbtut/gdbtoc.html

- http://www.unknownroad.com/rtfm/gdbtut/gdbtoc.html

Task

Fix buggy.cpp to obtain correct output.

Expected output:

```
1 2 3 4 5 6 7 8 9

1 2 3 4 5 6 7 8 9 10
```

Makefile

Target

Learn to write makefiles for project management.

Tutorial

- http://mrbook.org/tutorials/make/

Task

Modify the makefile in mkfile to compile the code inside the folder.

After successful compilation, run the following command:

```
make run
```

The expected output is: It works!
